

Number Problems

A collection of 9-1 Maths GCSE Sample and Specimen questions from AQA, OCR, Pearson-Edexcel and WJEC Eduqas.

Name:	
Total Marks:	

1. Write numbers in the boxes below to make the statement true.

$$15 \times 20 = 5 \times \boxed{} = 6 \times \boxed{}$$

[2]

2. Angus thinks of a number.

If he cubes his number and then adds 9, he gets 17.

What number is he thinking of?

[2]

3. Leo is using these numbers to make a new number.

11 1 3 6

- He can use brackets, +, -, × and ÷ as often as he wishes.
- He cannot use any number more than once.
- He cannot use powers.
- He cannot put numbers together, e.g. he can't use 136.

What is the biggest number he can make?

Show how he can make this number.

[4]

4. Peter says

- The sum of an odd number and an even number is even.
- The example $3 + 4 = 7$ shows that Peter is not correct.

Write an example to show that each of these statements is not correct.

(a) The sum of two prime numbers is always odd.

[1]

(b) Squaring a whole number always results in an even number.

[1]

5. The product of three numbers is 312.

Two of the numbers are 3 and 13.

What is the third number?

..... [3]

6. Here are some numbers.

9.6 12.6 15.4 7.6 12.4 17.4

Write the numbers in pairs so that the sum of the numbers in each pair is the same.

_____ and _____
 _____ and _____
 _____ and _____
 _____ and _____

[2]

7. Tanya needs to buy chocolate bars for all the children in Year 7

Each of the 130 children get one chocolate bar.

There are 8 chocolate bars in each packet.

Work out the least number of packets of chocolate bars that Tanya needs to buy.

[3]

8. There are 6760 people are at a rugby match.

3879 of the people are men.

1241 of the people are women.

$\frac{1}{4}$ of the children are girls.

Work out how many boys are at the rugby match.

..... [3]

9. Three whole numbers have a total of 100

The first number is a multiple of 15

The second number is ten times the third number.

Work out the three numbers.

[3]

10. Tomas ran a Lucky Dip stall.

There were 750 tickets, numbered 1 to 750

Tomas sold all the winning tickets, and some of the losing tickets.

He made a profit of £163

How many losing tickets did he sell?

[6]

11. Becky has some marbles.

Chris has two times as many marbles as Becky.

Dan has seven more marbles than Chris.

They have a total of 57 marbles.

Dan says:

"If I give some marbles to Becky, each of us will have the same number of marbles."

Is Dan correct?

You must show how you get your answer.

[3]

12. The two numbers, A and B, are shown on a scale.

The difference between A and B is 48

Work out the value of A and the value of B.

A =

B = [3]

Notes:

These questions have been retyped from the original sample/specimen assessment materials and whilst every effort has been made to ensure there are no errors, any that do appear are mine and not the exam board s (similarly any errors I have corrected from the originals are also my corrections and not theirs!).

Please also note that the layout in terms of fonts, answer lines and space given to each question does not reflect the actual papers to save space.

These questions have been collated by me as the basis for a GCSE working party set up by the GLOW maths hub - if you want to get involved please get in touch. The objective is to provide support to fellow teachers and to give you a flavour of how different topics "could" be examined. They should not be used to form a decision as to which board to use. There is no guarantee that a topic will or won't appear in the "live" papers from a specific exam board or that examination of a topic will be as shown in these questions.
