

## *Mission<sup>not</sup> impossible...*

Your challenge should you choose to accept it, is to work out what time our secret agent (3.14) will arrive back at HQ.

The flight between Heathrow and Greece is 3 hours and 30 minutes. However Greece is 3 hours ahead of us in the UK, because it is further East.

3.14's flight is scheduled for take off at 13:35 **local time**, and he thinks it will take him 45 minutes to go through customs and exit the airport.

Trains for central London leave for London at 3, 23 and 43 minutes past the hour and will take 38 minutes.

3.14 then needs to make a 7 minute walk from the train station to HQ. What is the earliest time that we can expect him to arrive?
