

What are the next two terms  
1, 3, 5, 7

Multiply  
 $16 \times 25$

What are the missing digits?

$$\begin{array}{r} 3 \_ 4 \\ - \_ 2 \_ \\ \hline 186 \end{array}$$

$$12 \times 7 = 4 \times \_$$

**READ THE QUESTION CAREFULLY**

My 4 rabbits have all had babies.

There were 22 new bunnies born.

Each rabbit had an odd number of bunnies  
and no two rabbits had the same number of  
babies.

How many bunnies did each rabbit have?

Is there more than one solution?
